

Installed .travis.yml

The screenshot shows the Visual Studio Code interface with the Explorer on the left and the Editor on the right. The Explorer shows the file structure of the project, including the .travis.yml file. The Editor shows the content of the .travis.yml file, which is a YAML configuration for Travis CI. The configuration includes the language (python), python version (3.9), and nightly updates. It also includes an install section with pip install commands for pytest and requirements.txt, and a script section that runs pytest gitremote.

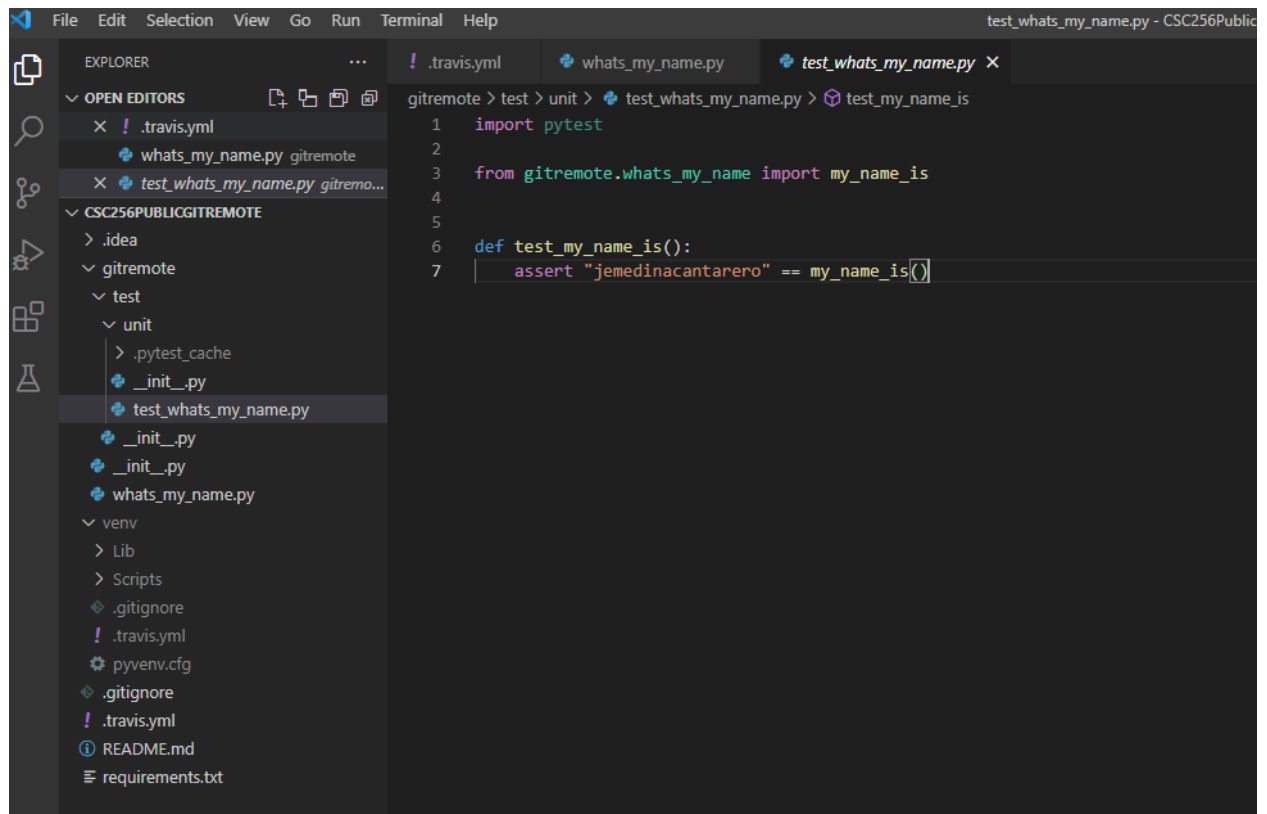

```
1 language: python
2 python:
3   - "3.9"
4   - "nightly"
5
6 install:
7   - "pip install pytest"
8   - "pip install -r requirements.txt"
9 script: python -m pytest gitremote
```

Changed values of whats\_my\_name on app as well as test.app

The screenshot shows the Visual Studio Code interface with the Explorer on the left and the Editor on the right. The Explorer shows the file structure of the project, including the whats\_my\_name.py file. The Editor shows the content of the whats\_my\_name.py file, which is a Python script. The script defines a my\_name\_is() function that returns the string "jemedinacantarero". It also includes a main() function that calls my\_name\_is().

```
1 def my_name_is():
2     return "jemedinacantarero"
3
4
5 # palaheel76 doesn't want any comments
6 def main():
7     print(my_name_is())
8
```

Ran gitbash to initialize push, added comment, and finally, pushed to github repo

 Josue Medina changed values of my\_name\_is Latest commit 4964776 11 minutes ago History

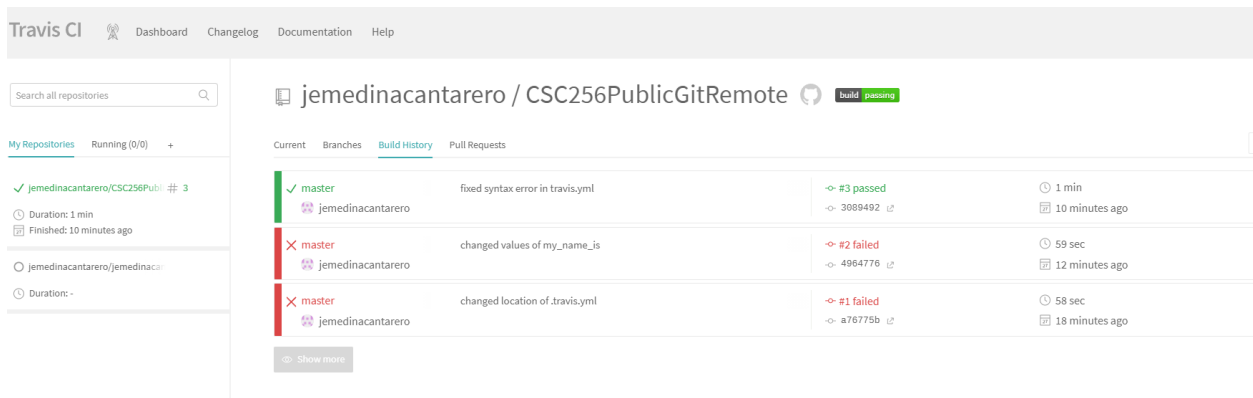

1 contributor

7 lines (5 sloc) 126 Bytes Raw Blame

```
1 def my_name_is():
2     return "jemedinacantarero"
3
4
5 # palahuel178 doesn't want any comments
6 def main():
7     print(my_name_is())
```

Synchronize GitHub repo to Travis CI, Build failed twice.

Identified errors on the build, and .travis.yml was on the wrong location and there were also spelling errors. Fixed both errors.

## No builds for this repository

Want to start testing this project on Travis CI?
